

Bible verses are like seeds  
that grow in your life.

Tape this square to the outside of your Ziploc® bag.

#### Supplies:

Ziploc® bag, paper towel, seeds (any kind, but beans or radishes will sprout well so you might want to try those), water, tape

Fold a square of paper towel and moisten it with water. You want it to be damp, but not super wet. Wring it out if necessary. Place your seeds on the towel and cover them (with the towel). Place them in your bag and zip it up. Set it aside and check it after a couple of days. Your seeds should have germinated. Now you can plant them in a pot or outside.

Let your plants remind you that Bible verses are like seeds that bring needed things into your life, just as real seeds bring things into your life like shade, beauty, food and even material to make clothing from!

Different verses will help different areas of your life but you have to “plant” them so they can grow and you can “bear fruit”!

You may want to take a picture of your germinated seeds and put it in your lapbook or notebook!
